ABOUT ME

Passionate Software Engineer tackling challenges at the intersection of technology and human experience. Seeking Front-end engineering.

PROFESSIONAL EXPERIENCE

Freelancer

Apr 2026 – Jul 2026

- Built Insta-shop, a SaaS platform that transforms Instagram shops into searchable, customizable online storefronts.
- Developed an interactive real-time hashtag network installation that visualizes visitor connections through animated nodes, graph relationships, QR-based participation, and live updates.

Edor Media (Access Training platform)

Oct 2025 – Mar 2026

Senior Front-End Engineer

- Built a scalable admin panel in a monorepo architecture using Next.js and TypeScript.
- Developed dynamic course flow management and a reusable form builder similar to Google Forms.
- Created a separate Vite-based student payment portal, integrating Stripe and premium credit features.
- Ensured 100% test coverage with Jest, improving reliability and maintainability.

Zood-Paz

Mar 2025 – Jun 2025

Front-end Engineer

- Built an AI-assisted SaaS platform that converted natural-language instructions into React application changes. Automated the build process of users' projects using Esbuild for React Router
- Integrated Server-Sent Events (SSE) for real-time communication
- Maintaining Monorepo with turborepo

Ariana Labs (Vendor at Irancell)

May 2023 - Mar 2025

Front-End Developer

- Developed a company-wide knowledge base system with an intuitive, searchable UI, **maintaining a 100% sprint success rate**
- Developed and integrated a comprehensive gamification module into the system
- Refactored troubleshooting flowcharts to improve code quality and simplify CRUD operation flow
- Mentored junior developers through code review sessions
- Implemented internal code of conduct guidelines. **Achieved a 20% improvement** in code readability and boosted team contribution efficiency

Comviva and Saie group (Vendor at Irancell)

Jun 2022 - Apr 2023

Web developer

- Contributed to the development and maintenance of the legacy My Irancell platform
- Implemented the Jib Jet module and various other internal modules
- Diagnosed and resolved critical security vulnerabilities, including XSS attacks and related exploits, and **achieved 0 exploits**
- Collaborated directly with product owners in regular meetings
- Analyzed business requirements and proposed effective, secure, and scalable solutions
