About Me

Passionate Software Engineer tackling challenges at the intersection of technology and human experience. Seeking Front-end engineering and React developer roles

Experience

Front End Engineer

Zood - Paz

2025 - present

- Designed and developed a SaaS platform featuring an AI-powered chatbot, automated the build process for React Router and Next.js applications, and implemented Server-Sent Events (SSE) for real-time communication between the AI and the client.

Front-end Developer

Ariana Labs (Vendor at MTN-Irancell)

2023 - 2025

- **Knowledge Management System:** (React, MUI, Redux, axios)
 - Designed a knowledge system featuring an intuitive, searchable UI, integrated with a comprehensive gamification system and an interactive troubleshooting flowchart.
- **Collaborated on KEDB (react, shadcn, zustand), IPF (Jqueyr, bootstrap)**
 - Collaborated on two additional projects to fix security vulnerabilities, improve site loading times by reducing unnecessary assets, and optimize form performance using debouncing and reducing re-renders.

Front-end Developer

Comviva & Saei group (vendor at MTN-Irancell)

2022 - 2023

- **Old My MTN-Irancell selfcare PWA & Business:**
 - Implemented user payments, jibjet and profile
 - Diagnosed and fixed Security issues, such as XSS
 - Attended meetings with project owners

Front-end Developer

Fan Agin

2021 - 2022

- **CRM System (react - typescript - react-saga)**
 - Implement Marketplace and purchess functionality
 - Implement Contract management via web socket
