ABOUT ME

Senior Front-End Developer (React, Next.js, JavaScript, TypeScript) with **5 years of shipping production UIs** in **MTN Irancell telecommunications**, e-learning, and SaaS, including a wallet module used by millions of people. Designed a **Turborepo monorepo** for a multi-package admin platform, **mentored junior developers**, and owned accessibility, performance, and payment flows end-to-end. Experienced in **AI-assisted development workflows** that accelerate delivery without compromising code quality.

SKILLS

- **Product Management & Product Ownership** · Engineering Management
- **JavaScript** · **TypeScript** · React · **Next.js** · SSR · HTML5 · CSS/SASS
- Responsive Design · Accessibility (a11y) · **SEO** · Core Web Vitals
- Jest · Playwright · TDD · Storybook
- Turborepo · Vite · Git · Docker · CI/CD (GitHub Actions. & Dokploy Automation)
- **SOLID** · **Agile/Scrum** · AI-Assisted Development · Node.js

PROFESSIONAL EXPERIENCE

Freelance Developer

Apr 2026 – Present

- Built a **multi-tenant** Instagram Shop for 20 shops, turning Instagram posts into storefronts with landing pages and an admin panel using Next.js, React, TypeScript, and Prisma.
- Built Hashtag Network, an interactive gallery installation that connected visitors through shared hashtags in a live, force-directed graph, engaging 400+ users during a one-month public demo. Stack: **Electron**, React, TypeScript, D3.js.

Edor Media (working on Access Training platform)

Oct 2025 – Mar 2026

Senior Front-End Developer

- Architected a Turborepo monorepo (1 app, 9 shared packages incl. form builder), cutting duplication by 40%
- **Brought 3 flows to WCAG 2.1 AA** with focus management and keyboard support verified with screen-reader testing.
- Built the student payment portal (Vite, Stripe) processing thousands per month
- **Improved LCP from 6 to 2 seconds for 5 pages** via image optimization, code splitting, caching, and lazy loading.
- Applied **test-driven development (TDD) to build and test 100+ reusable UI components** at Edora Media, each documented with Storybook stories and usage descriptions.

Ariana Labs (Vendor at Irancell)

Apr 2023 - Sep 2025

Senior Front-End Developer

- Owned and led the front end for a Knowledge Base system (JavaScript, React, MUI) with full-text search, used by thousands of employees reduced time-to-answer by 20%.
- Built gamification (Quiz/ leaderboard and so on) that raised weekly active users by 10% according to Irancell report.
- Centralized state in Redux, added a shared API client, and **decoupled modules**, cutting bug counts.
- Mentored 3 junior developers by assigning development tasks, **reviewing their implementations**, and providing **actionable feedback** on coding issues and areas for improvement.
- Closed an XSS vector in user-authored content by **sanitizing at input change with DOMPurify, plus tests**
- Authored front-end guidelines for a 12-person team and enforced them via ESLint and a PR checklist.

Comviva and Saie group (Vendor at MTN Irancell)

Jun 2022 - Apr 2023

Front-End Developer

- **Built the Jib Jet digital wallet** (balance, top-up, transaction history) in the My Irancell PWA
- Contributed to the **Backend-for-Frontend** layer, shared with the native app and serving millions of daily requests.
- Collaborated with product owners to refine feature requirements and UI behavior, evaluating filtering options and alternative interactions against user needs and technical constraints.

Fan Agin

May 2021 - May 2022

Junior Front-End Developer

- Developed a CRM and contract management platform using React, Redux, Redux-Saga.
- Multi-column client-side sorting that removed server round trips for thousands-of-row tables.

OPENSOURCE OR HUBBY PROJECTS

- Contribute to the **Slog-View** VScode extension
- React Special Cursor package on npm
